Challenge

MyCityCo2 goal is to motivate Municipalities to analyze their **CO2 footprint** in order to define a sustainability strategy.

Weaknesses from the existing Platform

Only in French

Only interfaced with Odoo (ERP)

Only Public space

Only for France

Problems

What does CO2 Emission for a City means?

MyCityCO2 Platform is unknown

Limited Access to Data & decentralized Information

Low Quality of Information due to aggregated data

Improvements delivered today

- Country Selection
- Translation
- Self Import
- Prototype Private Space

In 4 languages

Translate to FR, DE, IT, EN

From any ERP

Import Data

My Private space

To analyze my data

For any Country

CH version with Swiss Terms

Demo

MyCityCo2 (current version)

MyCityCO2 (Hackathon version)

MyCityCO2 Workspace (Prototype version)

Next Steps

Let’s do it again with any Countries !

Import additional CH-Data from the Federal Statistical Office

Launch the solution & communicate to CH-Municipalities

Team
